Maki SERIES

Balustrade

safety railings / pool fencing
gates / wind breaks

In extreme environments, such as coastal or high-wind prone areas, the glass and aluminium combination is durable and rust resistant.

Dynamic Windows' balustrades are very low-maintenance, requiring just an occasional hose off or wipe down to remove the natural build up of salt or airborne dust. All bolts and fixings are made from stainless steel, meaning rust won't become a performance issue.

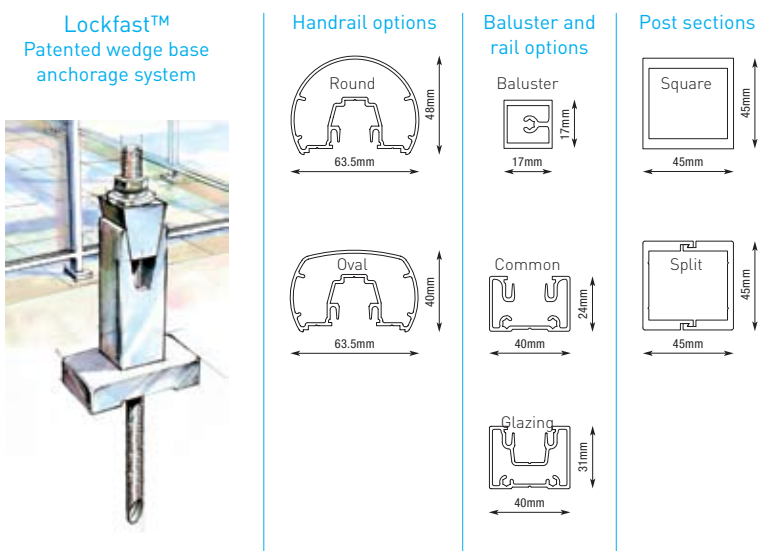

Dynamic Windows' balustrade system are precision engineered from only the highest quality materials for maximum performance.

features and benefits

- Aluminium handrails are Lockfast™ BAL900 Series incorporating the patented wedge base anchorage system with concealed bolt fixings
- Top handrails to be securely fixed to uprights and handrail components assembled with cast or moulded connectors without leaving sharp edges or corners.
- All exposed aluminium components are finished with polyester powder coating

Anchorage, handrail and post options
